(54) Electrical apparatus housing and method of mounting electrical apparatus therein

(57) A housing 1, 2 of electrical apparatus, for example one part of a two part connector, has a large recess for receiving electrical apparatus, for example a contact-carrying connector part (not shown); the housing has a small recess which receives a threaded insert 5 for receiving a screw by which the contact-carrying connector part may be secured. The insert 5 may be expanded, and may be married to the housing after painting the housing.
